SERVICE OVERVIEW

Hardware & Deployment

Every device we deliver arrives prepared, gets set up at the user's desk, and stays on our records until the day it is retired.

FROM ORDER TO RETIREMENT

01
Spec
Each role matched to a standard build.

02
Source
Business pricing, warranty registered to you.

03
Stage
Imaged and configured before it ships.

04
Deploy
Set up at the desk and checked with the user.

05
Retire
Wiped, removed from accounts and recycled.

STANDARD BUILDS

Mobile
Business laptops for staff who travel or split time between home and office. Docking station and second display optional.

Office
Compact business desktops for front office, accounting and shared workstations.

Engineering
Workstations with professional graphics for CAD, design and other demanding software.

Network
Managed switches, wireless access points and firewalls, configured to your network.

Builds are reviewed as models change. Current specifications and pricing are quoted on request.

DONE BEFORE IT REACHES THE DESK

- ✓ Software and firmware updated
- ✓ Endpoint protection and monitoring installed
- ✓ Standard applications and printers set up
- ✓ Files and settings moved from the old device
- ✓ Asset tag, serial number and warranty date recorded
- ✓ Old device wiped before it leaves your site

PLANNED REPLACEMENT

No surprise failures

We track the age and warranty of every device and flag the ones due for replacement in your IT strategy review, so hardware costs are budgeted a year ahead instead of arriving as emergencies.
