SERVICE OVERVIEW

Licensing Management

Software subscriptions add up quietly. We keep one accurate list of what you own, who uses it and when it renews, so every license is accounted for.

HOW WE MANAGE IT

Review
Every subscription listed with its cost, renewal date and who uses it.

Procure
The right plan bought through us, on one consolidated invoice.

Assign
Licenses given to new hires and reclaimed when people leave.

Renew
Renewals and true-ups tracked so nothing lapses unexpectedly.

Document
Records kept for audits, vendor reviews and compliance.

WHAT WE COVER

01

Microsoft 365
Business Basic, Standard and Premium, Exchange Online, Teams Premium, Copilot and Power BI.

02

Server and database
Windows Server, SQL Server and Remote Desktop licensing for on-site and hosted servers.

03

Line-of-business
ERP, accounting, CAD and industry applications, coordinated with the vendor.

04

Domains and security
Domain names, certificates and security subscriptions renewed on schedule.

WHAT EACH REVIEW LOOKS FOR

- ✓ Unused and duplicate licenses
- ✓ Users on a higher plan than they need
- ✓ Former employees still holding licenses
- ✓ Monthly plans that cost less as annual
- ✓ Features already paid for but not in use
- ✓ Software running without a valid license

AUDIT READY

Proof of what you own

If a vendor asks for a license count, you have a current record of every subscription, purchase date and assigned user to answer with.
